

## **Tree Plan 2 for the Ridge at South Cooper Mountain**

This arborist report is part of Tree Plan 2 required for the development of the Lolich-Bellairs Property in Beaverton, Oregon. Tree Plan 2 includes the Tree Table produced by Otak on 1/23/2017. The data on trees was collected by an ISA Certified Arborist in November 2016 and includes tree tag number, species, diameter (dbh), dripline radius, and health and condition rating. The Tree Table includes information on which trees will be removed and which will be protected.

Many trees must be removed to prepare the land for the proposed development and this will affect storm water absorption and wind behavior. Storm water management will be addressed by civil engineering at Otak. Changes in wind behavior and ambient temperature in the immediate vicinity will be addressed in the landscape plan showing new trees and other vegetation to be planted on site.

The following tree protection measures apply to trees being preserved.

- A construction fence shall be placed at the critical root zone of trees to be preserved.
- The fence shall be placed before physical development starts and must remain in place until physical development is complete.
- The fence shall consist of 5-foot tall metal fencing secured to 6-foot tall metal posts driven into the ground.
- The critical root zone is 5 feet outside the average dripline.

I recommend that fencing also be installed at property perimeters that are not already fenced or separated by a roadway for the protection of neighbor trees.

Without supervision by an arborist and prior approval by the City, none of the following is allowed within protected areas:

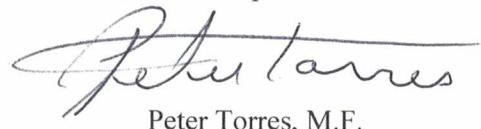

1. Construction or placement of new buildings;
2. Grade change or cut and fill, except where hand excavation is approved with the submittal of an arborist's report, as part of application approval;
3. New impervious surfaces;
4. Trenching for utilities, irrigation, or drainage;
5. Staging or storage of any kind;
6. Vehicle maneuvering or parking.

The goal of this Tree Plan is to meet the requirements of the tree preservation code, and to observe all laws, rules, and regulations. All trees to be removed should be verified and marked and all tree protection measures should be inspected and approved before any clearing or grading work begins. It is the owner's responsibility to implement this Tree Plan and to monitor the construction process to its conclusion. Deviations can result in tree damage, liability, and violations of the City Code.

## **Assumptions and Limiting Conditions**

Multnomah Tree Experts, Ltd. 8325 SW 42<sup>nd</sup> Ave. Portland, OR 97219  
(503) 452-8160 Fax (503) 452-2921 [peter@multnomahtree.com](mailto:peter@multnomahtree.com)

1. Client warrants any legal description provided to the Consultant is correct and titles and ownerships to property are good and marketable. Consultant shall not be responsible for incorrect information provided by Client. Client agrees to defend, indemnify, and hold Consultant, its officers, directors, employees, and agents harmless from any claims or damages, including attorney fees, arising out of acts or omissions of Client in connection with work performed pursuant to this Agreement.
2. All data will be verified insofar as feasible; however, the Consultant can neither guarantee nor be responsible for the accuracy of information provided by others.
3. The Consultant shall not be required to give testimony or attend court or hearings by reason of this report unless subsequent contractual arrangements are made, including additional fees.
4. The report and any values expressed therein represent the opinion of the Consultant, and the Consultant's fee is in no way contingent upon the reporting of a specified value, a stipulated result, the occurrence of a subsequent event, nor upon any finding to be reported.
5. Sketches, drawings and photographs in the report are intended as visual aids and may not be to scale. The reproduction of information generated by others will be for coordination and ease of reference. Inclusion of such information does not constitute a representation by the consulting arborist, or by Multnomah Tree Experts, Ltd., as to the sufficiency or accuracy of the information.
6. Unless expressed otherwise, information in the report covers only items that were examined, and reflects the condition of those items at the time of inspection. The inspection is limited to visual examination of accessible items without laboratory analysis, dissection, excavation, probing, or coring, unless otherwise stated.
7. There is no warranty or guarantee, expressed or implied, that problems or deficiencies of the plants or property in question may not arise in the future.
8. The report is the completed work product. Any additional work, including production of a site plan, addenda and revisions, construction of tree protection measures, tree work, or inspection of tree protection measures, for example, must be contracted separately.
9. Loss or alteration of any part of the report invalidates the entire report. Ownership of any documents produced passes to the Client only when all fees have been paid.
